SUMMARY

Recent Computer Systems Technician graduate with hands-on enterprise IT experience in T1 support, hardware diagnostics, and Windows administration. Skilled in networking fundamentals, workstation deployments, OS migrations, and service desk operations. Seeking an entry-level IT Support, Network Support, Data Center, or Infrastructure Technician role where I can apply my technical skills and continue developing professionally.

EXPERIENCE

Temporary President 10/2025 - 06/2025
Mohawk College Project Management Club

Production and Packing Associate 06/2023 - 09/2026
Mabel's Labels

- Demonstrated leadership by coordinating tasks, assisting colleagues, and providing guidance during periods of limited supervisory oversight.
- Organized and verified outgoing orders, ensuring accurate labeling, proper sorting, and correct shipping information to minimize errors.
- Sorted and organized production materials and supplies to support efficient daily production operations.

IT Support/Systems Support Co-op 01/2025 - 08/2025
Johnson Electric

- Provided Tier 1 technical support in a corporate IT environment, troubleshooting hardware, software, and Windows operating system issues.
- Diagnosed and resolved workstation hardware issues, including peripherals, system performance, and device configuration.
- Assisted with Windows 11 migration project, preparing systems, configuring devices, and supporting users during deployment.
- Managed and responded to IT service desk tickets, documenting solutions and escalating complex technical issues when required.
- Supported system configuration and application setup according to internal IT/company policies and security guidelines.
- Took initiative to learn about cross-departmental operations, gaining exposure to receiving, inventory management, parts handling, and documentation processes.

EDUCATION

Computer System Technician - Network System 09/2023 - 12/2025
Mohawk College - Diploma
Relevant Coursework: ITIL Client Support, Cisco Routing & Switching, Cloud Computing Technical
Project/Lab Experience:

- Installed and configured operating systems in virtual environments for system administration practice
- Configured basic network environment using TCP/IP addressing, DNS, and DHCP
- Practiced troubleshooting connectivity and system configuration issues in lab environments
- Applied Cisco networking fundamentals including routing and switching concepts

SKILLS

Windows OS Administration (Windows 10, 11 & Server)
Python & Web Scripting (HTML, CSS, Python)
